

About the Workshop

This workshop provides a practical introduction to the development, adaptation, and validation of research instruments used in health, social science, and behavioral research. Participants will learn the process of translating and adapting existing tools, understanding the concepts of reliability and validity, and developing new instruments for research purposes. Through interactive sessions and practical examples, the workshop will also cover psychometric evaluation techniques for assessing the reliability and validity of research tools. It is designed to equip researchers, faculty members, postgraduate students, and research scholars with essential skills for developing scientifically sound and reliable measurement instruments.

Workshop Sessions

Session 1: Introduction, Translation and adaptation of Existing Tool

Session 2: Familiarising the concept of Reliability and Validity

Session 3: Steps in the Development of a New tool.

Session 4: Psychometric evaluation: Assessing the reliability and Validity

 **Registration Fee:**

 **₹750/- (Seven hundred and fifty Rupees Only)**
(Non-Refundable)

LAST DATE OF REGISTRATION: JUNE 30, 2026
